## Education

10/2024 – 05/2025

Austin, Texas,  
United States

### Software Developer Bootcamp

*Austin Community College*

- Built 25+ applications from the ground up using Javascript, HTML, and CSS.
- Used ReactJS in coordination with Javascript and Node.js in order to build fully functional applications with proper backend server integration.
- Experience using MongoDB, and SQL to build data structures to store and read from using any given application.
- Wrote and tested code capable of making thousands of calls to an API, storing instances of data for potential users.
- Used Amazon Web Services in order to deploy applications to the cloud.
- Familiarized with development environments such as Microsoft Visual Studio Code, while integrating with tools such as Github, Postman, npm, Bootstrap, Jest.
- Made use of AI assistants such as GitHub Copilot in order to help reduce the time spent on repetitive coding tasks.

12/2023

Austin, Texas,  
United States

### Associate of Science in Engineering

- Electronic circuits design and simulation using SPICE simulation software in coordination with physical simulations using of tools such as multimeter and oscilloscope
- Engineering calculus and differential equations
- Experience using different engineering physics and chemistry lab equipment such as spectrometers, and microscopes

## Professional Experience

05/2023 – Current

Cedar Park, Texas,  
United States

### Operations Associate

*JCPenney*

- Taking routine inventory analysis of an estimated 4k+ items using SQL while recording results of discrepancy across multiple divisions of the store on a four week rotation.
- Performed a weekly analysis of SQL data pertaining to the store's 400+ floor displays in order to more accurately comply with company standards.
- Maintained proper communication with the rest of the operations team in order to plan and finish tasks in a manner that uses the least amount of time and resources.
- Trained new sale and operations associates on how to complete various tasks, perform certain procedures, and use multiple technologies throughout the store .
- Answered customer service calls to help cater to customer needs on a daily basis.

## Skills

### JavaScript

Frontend and Backend Development

● ● ● ● ●

### Project Planning

Trello, Jira, Asana ...

● ● ● ● ●

### Database Management

MongoDB and SQL

● ● ● ● ●

### Microsoft Visual Studio Code

Git, HTML, CSS, JS, Node.js, React
